

BOLTED PRESSURE SWITCH LIFE EXTENSION SERVICES

ORIGINAL SWITCHBOARD

RETROFITTED SWITCHBOARD

WE HAVE SOLUTIONS FOR THE FOLLOWING BRANDS:

- Boltswitch
- General Electric
- Siemens/ITE
- Westinghouse/Cutler Hammer/Eaton
- Federal Pacific
- Pringle
- Square D

WE PROVIDE CUSTOM ENGINEERED SOLUTIONS

Advanced Electrical & Motor Controls specializes in life extension programs for bolted pressure switches. We retrofit a new current-series circuit breaker to replace the existing bolted pressure switch. We can utilize a variety of replacement circuit breakers, including the Square D MTZ, Eaton MDS, ABB Emax and Power Break II.

The retrofitted circuit breaker will lower the Incident Energy Level to create a safe work environment. We can add remote operation along with communication. Our staff will provide a recommended retrofit unit that adapts into the existing switchboard with minimal modifications to the existing switchboard. The retrofit kit is supplied with detailed instructions, drawings, and hardware required for field installation.

TURNKEY RETROFIT SOLUTIONS

In partnership with Group CBS Field Services, a NETA Testing Company, AEAMC provides complete turnkey retrofit solutions. The Field Services team assists with all facets of an outage to manage the retrofit process for you.

CALL US TODAY

At AEAMC we work hard every day to provide innovative, cost-effective solutions to our customers. Businesses today operate in a globally competitive market and constantly have their eye on the bottom-line. We take great pride in offering high quality solutions at affordable prices.
