

MOTOR CONTROL LIFE EXTENSION SERVICES

Advanced Electrical & Motor Controls (AEAMC) specializes in life extension for obsolete motor control center (MCC) buckets by integrating new components into newly manufactured replacement buckets. This cost-effective solution requires minimal downtime—simply replace your outdated bucket with a modern, fully compatible unit. No modifications to the existing MCC structure are necessary. The result: a seamless upgrade that can extend the life of your MCC by up to 20 additional years.

Retrofit units are available for:

Allis Chalmers/ITE/
Furnas/Siemens
Allen-Bradley
Fuji

Federal Pacific
General Electric
Klockner Moeller

Nelson
Powell
Sylvania

Square D
Mitsubishi
Westinghouse/Cutler-
Hammer/Eaton
